PROFESSIONAL SUMMARY

Computer Science Engineering student specializing in AI and Data Analytics with hands-on experience in **full-stack web development, REST APIs, database integration, and responsive web applications**. Experienced in building frontend and backend systems using **React.js, Node.js, Express.js, MongoDB, Python, and SQL**. Developed and deployed real-world web applications involving authentication, admin dashboards, form workflows, API integration, and database-driven functionality. Strong foundation in software engineering, problem solving, debugging, Git, and modern AI-assisted development tools, with a focus on building scalable and user-focused applications.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java, SQL
Frontend Development: HTML, CSS, React.js, Next.js, Tailwind CSS
Backend Development: Node.js, Express.js, Flask, REST APIs
Databases: MongoDB, MongoDB Atlas, MySQL, SQL
Authentication & APIs: JWT, REST APIs, JSON, HTTP Methods, API Integration
Developer Tools: Git, GitHub, VS Code, Postman
Deployment & Cloud: Vercel, Render, Firebase, Supabase
Software Engineering: Requirements Analysis, Debugging, Error Handling, Version Control
AI-Assisted Development: ChatGPT, GitHub Copilot, Cursor, Windsurf, Google AI Studio, Prompt Engineering

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science Engineering **2023 – 2027**
Parul Institute of Engineering and Technology, Parul University

PROJECTS

Narrative Analytics Engine Web Application Live URL
Python – Pandas – NumPy – Scikit-learn – Flask – Data Visualization

- Designed and developed an AI-powered web application that processes structured datasets and converts them into **narrative insights, visualizations, and analytical reports**.
- Built data processing workflows using **Python, Pandas, and NumPy** for data cleaning, preprocessing, exploratory analysis, and feature preparation.
- Implemented Machine Learning workflows using **Scikit-learn**, including predictive analysis and clustering techniques to identify patterns and trends.
- Developed backend functionality using **Flask** to process datasets, execute analytical workflows, and serve results to the application interface.
- Integrated analytical outputs with interactive visualizations to present **data-driven insights and decision-support information** through a user-friendly web interface.

ORWIN GROUP – Academic Research & Publication Services Website Live Demo
React.js – JavaScript – Node.js – Express.js – MongoDB – REST APIs

- Designed and developed a responsive **full-stack corporate web application** using React.js, Node.js, Express.js, and MongoDB.
- Built responsive frontend interfaces for **services, careers, contact, enquiry, and quote workflows** with structured navigation and user-focused experiences.
- Developed **RESTful APIs** using Node.js and Express.js for form processing, validation, data management, and communication between frontend and backend systems.
- Integrated **MongoDB** for persistent storage and implemented backend workflows for contact enquiries, career applications, and quote requests.
- Developed a protected **admin dashboard** with authentication and authorization for managing website content, enquiries, career applications, and quote requests.
- Used **Git and GitHub** for version control and deployed the application using modern web hosting platforms.

CERTIFICATIONS

- **Become a Full-Stack Web Developer Learning Path** – LinkedIn Learning
- **React Essential Training** – Udemy

ACHIEVEMENTS

- Completed cohort participation and incubation training at **PIERC**, gaining exposure to startup development, entrepreneurship, product development, and business strategy.
- Secured startup funding under the **Student Startup and Innovation Policy (SSIP)** for an E-commerce startup initiative.
