MAJJI VIJAYENDRA

+91 63006 38396 | vijayendramajji22@gmail.com | LinkedIn | GitHub

Professional Summary

Motivated B.Tech Computer Science Engineering student with strong foundations in Artificial Intelligence, Machine Learning, Data Analytics, and software development. Proficient in Python, SQL, Machine Learning algorithms, and data-driven technologies, with hands-on experience in developing AI-powered solutions involving predictive analytics, Natural Language Processing (NLP) and intelligent automation systems. Passionate about leveraging AI and emerging technologies to solve real-world challenges through scalable, innovative, and data-driven solutions.

Technical Skills

Programming Languages: Python, Java, SQL, C

AI/ML: Machine Learning,Predictive Analytics,Natural Language Processing (NLP), Generative AI,Prompt Engineering

Big Data/Analytics: Hadoop, Spark, Pandas, NumPy, Matplotlib, Data Preprocessing, Exploratory Data Analysis

Data Visualization: Power BI, Tableau.

Databases: MySQL, MongoDB

Development Tools: Git, VS Code,Jupyter Notebook, Google Colab

Core Subjects: Data Structures, DBMS, Object-Oriented Programming, Big Data Analytics

Projects

Narrative Analytics Engine Web Application Live URL

Technologies: Python, Machine Learning

- Designed and developed an AI-powered web analytics application for analyzing structured datasets and generating meaningful insights.
- Implemented data preprocessing, Exploratory Data Analysis (EDA), and Machine Learning techniques to identify patterns and trends.
- Integrated analytical outputs into a user-friendly web interface for data visualization and decision support.
- Applied explainability and data-driven reporting techniques to present analytical findings clearly to non-technical users.

Janu Collection – E-Commerce Web Application Live URL

Technologies: MongoDB, Express.js, React.js, Node.js.

- Developed and deployed a full-stack e-commerce application based on real-world business requirements.
- Built responsive frontend components using React.js and backend REST APIs using Node.js and Express.js
- Designed MongoDB schemas for products, users, and order management.
- Implemented an administrative dashboard for managing products, orders, and application operations.
- Integrated frontend, backend, and database components to deliver a functional production-ready application.

Education

Bachelor of Technology in Computer Science Engineering

Parul Institute of Engineering and Technology (PIET), Parul University

2024 – 2027 — Expected Graduation: June 2027 CGPA: 6.89

Certifications

- Geodata Processing Using Python and Machine Learning – ISRO (IIRS)
- Python, SQL, Tableau for Data Science – Coursera
- Generative AI: Prompt Engineering – Coursera
- Value Added Course – Hadoop and Spark – Parul University
