MAJJI VIJAYENDRA

+91 63006 38396 | vijayendramajji22@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Motivated B.Tech Computer Science Engineering student with foundational knowledge in Data Science, Data Analytics, Python, SQL, and reporting concepts. Skilled in data handling, data cleaning, dashboard creation, and extracting actionable insights from datasets. Passionate about analytical problem solving and applying data-driven solutions in real-world business environments with a strong willingness to learn and adapt.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **Data Analysis & Reporting:** Data Cleaning, Data Validation, Data Processing, Statistical Analysis
- **Visualization Tools:** MS Excel, Tableau, Power BI
- **Databases:** MySQL, MongoDB
- **Developer Tools:** Git, GitHub, VS Code, Google Colab, Jupyter Notebook
- **Additional Competencies:** Machine Learning, Dashboard Creation, Analytical Thinking

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science Engineering 2023–2027
Specialization: Big Data Analytics
Parul Institute of Engineering and Technology, Parul University

PROJECTS

SQL-Based Sales Performance Analysis
Technologies: MySQL, Excel

- Designed and analyzed sales datasets using SQL queries and database operations.
- Performed joins, aggregations, filtering, and data extraction for business reporting.
- Identified customer purchasing trends and sales performance patterns.
- Generated analytical reports supporting data-driven decision-making.

Data Analytics Dashboard for Business Insights
Technologies: Python, Excel, Power BI, Jupyter Notebook

- Performed data cleaning, preprocessing, and transformation on datasets using Python in Jupyter Notebook.
- Conducted exploratory data analysis (EDA) to identify trends and patterns from business datasets.
- Developed interactive dashboards for monitoring KPIs and business metrics using Power BI.
- Analyzed trends and generated insights through visual reporting techniques.
- Improved reporting efficiency through data visualization methods.

Narrative Analytics Engine Web Application [GitHub]
Technologies: Python, Machine Learning

- Designed and developed a web-based analytics application to analyze structured datasets and generate meaningful insights.
- Implemented data preprocessing, exploratory data analysis (EDA), and machine learning techniques to identify patterns and trends.
- Integrated analytical results into a web interface to present insights in a clear and user-friendly manner.
- Focused on explainability and data-driven decision support for non-technical users.
- Applied data visualization and reporting techniques to improve understanding of analytical outputs.

CERTIFICATIONS

- **Geodata Processing Using Python and Machine Learning**
  Indian Institute of Remote Sensing (IIRS), Indian Space Research Organization (ISRO)
  Issued: March 2025

- **Python, SQL, Tableau for Data Science – Professional Certificate**
  Coursera

- **Generative AI: Prompt Engineering**
  Coursera

ACHIEVEMENTS

- Completed cohort participation and incubation training at **PIERC** with exposure to startup development, entrepreneurship, and business strategy.

- Secured startup funding under **Student Startup and Innovation Policy (SSIP)** for an e-commerce startup initiative and worked as a Co-Founder in building and scaling the venture.
